N = 8 qubits (dim 256)
±1 sample s.d. (state-to-state spread)
±2 s.e.m. (statistical error of the mean)
Monte Carlo mean (400 states)
exact Haar average
min(k, N − k)ln 2
S(Rk) [nats]
qubits in radiation k
N = 10 qubits (dim 1024)
S(Rk) [nats]
qubits in radiation k
N = 12 qubits (dim 4096)
S(Rk) [nats]
qubits in radiation k
N = 14 qubits (dim 16384)
S(Rk) [nats]
qubits in radiation k
