(a) Poincare AdS3 semicircle
closed form 2Lln(ℓ/ε)
numerical quadrature
geodesic length
interval length ℓ
(b) BTZ candidates (r + = 1)
crossover 5.592
connected
horizon-wrapping
minimum (RT)
length
boundary interval Δϕ
(c) Minimal entropy: switch of branch
r + = 0.5
r + = 1
r + = 2
S = Length/4G N
Δϕ
